

CAB-100/2x50

Product Description

The cable enables connection between a 100-pin high density on-board plug and 2 50-pin commonly used IDH type male headers. It splits into 2 ribbons of which each of them handles 50 signals.

The cable allows to easily interface between the motion controller and an external interface board. The cable length can be adjusted according to customer specification.

Features:

- 100-pin 0.050 mil pitch socket
- Latching eject mechanism facilitates mating and un-mating
- 2x IDS type 50-pin 0.100 mil female connectors
- 2x 28 AWG ribbon cables
- Standard cable length 3 ft. (914 mm)
- Custom length available
- 3 dimensional mating
